EDUCATION

B.Tech – Computer Engineering (Software Engineering) | VIT, Pune CGPA: 8.76 / 10 | Expected Jun 2028

TECHNICAL SKILLS

Languages:	Python, C++, C, MySQL, ELK Stack.
Web & DB:	HTML, CSS, SQL, JavaScript, Express.js, Node.js, MongoDB, React.js, Next.js , System Design
Tools:	Git, Git Bash, GitHub, Power BI, Excel, Proteus Professional Simulation tool, Siemens Teamcenter
Concepts:	Data Structures, Algorithms, OOP, Problem Solving, ML (basics), Operating Systems, DBMS
	Solved 150+ LeetCode and 50 GeeksforGeeks questions

PROJECTS

Vision of Wings – AI Accessibility Platform (Working)

Building an AI-powered assistive platform aimed at improving digital accessibility for visually and hearing- impaired individuals through intelligent assistance tools. -> **(Aavishkar Zonal Level Selected Project)**

Tech Stack: *Python, OpenCV, AI/ML, Speech Recognition, HTML, CSS, JavaScript*

Real-Time Object Detection and Audio Feedback for Visually Impaired Assistance Using YOLO and OpenCV

- Research Paper Published Project.

AI – Vulnerability Scanner

- An automated cybersecurity vulnerability scanner that scrapes multiple sources, uses AI to analyze and structure data, and presents findings in an interactive dashboard.

Battery Monitoring System – Industry Project (MakeTechBerry Ltd.)

- Completed an industry-sponsored Battery Monitoring System project offered by MakeTechBerry Ltd.; patent application filed for the developed system.

CERTIFICATIONS & ACHIEVEMENTS

Google Cloud – Gen AI (Smart Internz)

- Hands-on experience with Gen AI workflows, prompt engineering, LLM integration, and cloud-based AI solutions.

Cloud Foundations – AWS Academy (Badge Earned)

- AWS Skill Builder Digital Team Subscription – 1 year

Infosys Springboard

- Python, Artificial Intelligence, HTML, C Programming, etc.

Internship

- SDE Intern at Talent Tapped – (Part Time)
- Virtual Internship with Smart Internz on Google's Generative AI

Coursera

- Programming in C++: A Hands-on Introduction –
- Encryption and Decryption using C++
- IBM DevOps and Software Engineering Professional Certificate
- Decentralized Finance (DeFi): The Future of Finance Specialization

Smart India Hackathon

- Built an app for pothole management, with separate user and admin views -> CITY PULSE.
- Built a project on MPLAD's Sentinel for fraud detection

Additional Activities

- Participated in multiple technical competitions on Unstop.
- Represented my college at Zonal level in Aavishkar Competition
- Actively building skills in software development & backend programming.
- Working in the Ekasutram Official Mathematics Club of VIT Pune as Technical Secretary.
- Worked as Database Head in the VIT Reading Club (VRC).
- Worked as Function Execution Secretary in the ABVP VIT
